## WHO WE ARE

Compiling over 50 years of experience across multiple industry verticals including special recovery, logistics, risk control & insurance: National Recovery stands alone as the only Salvage Logistics company of its kind.

Our network consists of hundreds of connections throughout the United States, enabling us to provide our clients with top notch service. Combining all of these skill sets & relationships to build National Recovery, this is how we have been able to make the daily impact for our clients since the time of our origin.

## OUR MISSION

Our approach to Salvage Logistics is entirely customer centric & tailored to meet their ever-evolving needs.

Deliver on our promise to serve the interests of our clients by applying the most cost effective solutions while exceeding expectations.

Executing on a daily basis empowers our customers to focus on full-filling their promise to their clients.

### PERISHABLES & CONSUMER GOODS

Experts in obtaining the necessary disposal permits by utilizing our extensive network of landfills, along with adherence to regulatory guidelines.

### HAZMAT CARGO

Removal of hazardous cargo demands meticulous adherence to stringent guidelines for both labor & extraction processes. Count on us to provide the skilled personnel & experienced supervisors required to safely & effectively manage the transportation & disposal.

### EQUIPMENT

From agricultural to industrial machinery, diverse equipment comes with unique demands when it comes to relocation. NR will source proficient mechanics & professional operators to execute the intricate process of moving & disposing these specialized machines.

## JOB PROCESS

Submission

Relevant information for your claim such as job classification, bill of lading, point of contact, location & images.

Project  
Coordination

Research local regulations on disposals, receive proper permits, compile options for review.

Customer  
Approval

Provide customer pricing, options & response time.

Execution

NR's Dispatch Department facilitates & manages the project based on customers' direction.

Delivered

NR reports back to customer with project completion & remits proper documentation. Requests customer follow up to ensure NR exceeded expectations.
